Response Rate	3/6 (50%)
<ul style="list-style-type: none"> • real life examples that engage with the readings. as well as mr. stewart's explanations of the readings and current events. • Professor Stewart is very intelligent in the course material and is very passionate about teaching; This helps so much with diving into the material and shows immense care about furthering the understanding of the topics relating to the course material. He knows a lot of examples that relate to the readings or theories, so if we need him to explain more he is able to use another reading or study to further explain the concept. He also knows incredible resources for researching, such as zotero and research rabbit. I have never heard of any applications similar to these, they have been very helpful, and not only with this course. The quizzes are actually helpful in my opinion, they help with accountability and keeping up with the schedule for the class. This is my first semester at FSU and I am very grateful to have taken this professor. • Mr. Stewart was very interactive and spent a great deal of time challenging students to think critically and engage with concepts. 	

19 - What aspects of the course and/or James Stewart's instructional methods could be improved that would enhance your learning? Please give examples. -

Response Rate	4/6 (66.67%)
<ul style="list-style-type: none"> • I would say just be more mindful of the course material because it was a lot of material along with my other classes ALOT OF READING. Overall, it was an amazing course, and I recommend taking his class. • n/a • I haven't taken the exam yet so I am not sure if there is a study guide, just like a list of topics to study that covers the course, but that would be really helpful. I feel like this course covers a lot of different topics, authors, and theories which most relate or intertwine with each other, so it may be helpful to have a list of the topics to focus in on. • The analysis of studies and statistics were interesting and helpful, but I would have liked to study more examples of the radical right rather than concepts of radical right support. However, my very small criticism is about balance, not content. I think the content was very helpful but I would have liked to have more emphasis on examples across Europe. 	

20 - Please list additional comments and/or suggestions.

Response Rate	1/6 (16.67%)
<ul style="list-style-type: none"> • loved this class! it taught me a lot of new things on politics and how to be a political scientist.

18 - What aspects of the course and/or James Stewart's instructional methods have you found the most useful or valuable for learning? Please give examples. -

Response Rate	7/16 (43.75%)
<ul style="list-style-type: none"> I found the readings to be extremely valuable for learning. Break down of the lesson each day and consistency The in-class activities used to provide us with real time examples of what the author's of our readings were trying to convey. Mr. Stewart took very different academic papers and, throughout the course, connected different issues to one another. Moreover, he took broader concepts (i.e. what does this person say are the aspects of what makes up a far right party) and kept re-enforcing them throughout the course to solidify the information in my brain. The five-minute break kept myself stimulated in the class, as someone with attention issues I found the quick breaks a nice way to regroup and refocus on the material. I enjoyed his explanations of the academic articles because it made them more comprehensible. I also enjoyed our group discussions of what we read because it gave us a chance to interact with one another and discuss what we had read. There were also times when we did a class activity/game that was related to the concepts we had read about and it really improved my comprehension of the material. fabulous 	

19 - What aspects of the course and/or James Stewart's instructional methods could be improved that would enhance your learning? Please give examples. -

Response Rate	7/16 (43.75%)
<ul style="list-style-type: none"> Though the readings were intellectually stimulating, I believe reducing the quantity from three readings per week to two and changing the reading quiz format from pop quiz to scheduled quiz would allow for more thorough comprehension. I also believe that adding at least some PowerPoint lecture content separate from readings would be beneficial. Shorter essays Get comfortable with talking in front of a class of students as well as projection. The content was great and the manner of delivery was great, but there were times where I wasn't exactly sure what you meant at first until you talked directly at us. I think Mr. Stewart did an above satisfactory job at instructing this course. However, I think reading quizzes were very narrow and hype focused on that day's reading. Expanding them to incorporate materials and concepts from other readings would be helpful. (i.e., instead of having a reading quiz on just one reading, expanding them to cover two or even three readings may help this issue. Further, it may help with ensuring students do ALL the readings instead of trying to guess what day there would be a quiz on.) Honestly, the class is structured well and I did not find any room for improvement. The only suggestion I could make is extending the amount of time per class meeting. I often found us going over time a lot because there is a lot of material to unpack. I think we could have had more lectures. I am an auditory learner so I generally prefer more lectures to readings and I think that if some of the readings were turned into lectures it would be beneficial. I liked talking with a group about the readings but it is clear that the professor knows the most about the subject and I found myself wishing to hear more from him during this semester. Lectures would also help students know exactly what we should know/remember from the course. There were times when a question would be asked to the class and no one would raise their hand to answer it or people would give the wrong answer, which isn't necessarily a huge problem as it only happened a couple of times, but I feel if we were being told the most important bits of information in a structured lecture it would help with overall class comprehension of the material. Having the majority of the readings being written by academics for academics makes it a little difficult as an undergrad to remember the most important and fundamental concepts of the course which is why I think a combination of both lecture and reading would ensure the class's comprehension of the material while also exposing us to academic literature. nothing i can think of 	

20 - Please list additional comments and/or suggestions.

Response Rate	4/16 (25%)
<ul style="list-style-type: none"> N/A Mr. Stewart is very intelligent. I think going forward he will be an exceptional scholar! N/A I think we could have had a little more exposure to the radical right parties/electorate themselves because it's one thing to say a party has far-right beliefs but its another to know exactly how such individuals go about expressing those beliefs. We definitely were shown material like that during this course but I think we could have looked at and discussed it more, especially in discussions about supply and demand side explanations for far-right electoral success. This sort of material could replace some readings and allow the class to have a better understanding of the core elements of far-right parties (authoritarianism, nativism, populism, etc.).

Response Rate	6/11 (54.55%)
<ul style="list-style-type: none"> • He is very clear and concise and caring • gives a lot of real life examples • Prof. Stewart made a constant effort to engage with the class by asking us questions throughout lectures. • When he began going slower on the PowerPoints, I found that understanding the material went better. I understand that this was a six week course but when we would rush through the PowerPoints and have twenty minutes left of class, I felt as though we didn't need to go as fast. Professor Stewart definitely did better at going slower after the first two weeks of class so that was appreciated. • He is always open to questions and very enthusiastic about the topic/teaching. He made me want to learn more about the topic and come to class. • Professor Stewart would actively ask the class to participate throughout by asking us about certain topics before or during the lessons. He asked us to pull from what we already knew and gathered from the weekly readings to engage actively throughout the course. He also managed to make the class continue without it being awkward when nobody would speak. He took care in what students were struggling on and actively made an effort throughout the entire semester to improve what students felt could make the course even better and I felt that it ended up reflecting on the class as a whole by the end of the semester, as the class had easily become one of my favorites. 	

19 - What aspects of the course and/or James Stewart's instructional methods could be improved that would enhance your learning? Please give examples. -

Response Rate	6/11 (54.55%)
<ul style="list-style-type: none"> • Nothing at all • Go over the homework on Mondays. • I think moving slower through the course material could help improve learning, but I understand the extreme limitations of a 6 week course. • If he could help make connections between the book and the PowerPoints, I feel as though that would help when it comes to studying outside the classroom. • N/A • Not many. Professor Stewart demonstrated phenomenal instructional ability and made the class engaging and fun. He worked with students on what they were struggling with and was always available to assist in any areas of confusion.

<ul style="list-style-type: none"> • n/a • Professor Stewart is the kind of professor where it is obvious that he understands the material and that he understands what he is telling us but at times, it was difficult to understand what he was explaining because we did not have the background that he did in the subject matter. He definitely knows what he is talking about but he didn't do a great job at relaying the information to us. Sometimes it felt as though he was just reading off the PowerPoints and when someone would ask a question he would reference how the book does a great job at explaining it but he himself wouldn't explain it. He would just say to look in the book. While the book may do a good job at explaining it, the chapters are very long and it is difficult to know what the book is explaining at times because of the words that the book would use. All in all, professor Stewart demonstrated his mastery of the material but it was hard to learn the material from him. He did the best he could with being a first time teacher and we all understood that there would be a learning curve when it comes to teaching so I am not sure how high our expectations were. While I would not recommend a friend to take a class taught by him nor would I want to take another class taught by him, having him teach CPO 2002 to me was not as bad as I expected it to be. • Great teacher, cares about his students. Great class, very interesting.I enjoyed it ! • Nothing - I loved the class. :)
